

## JUMO Cloud – IoT Platform for Reliable Process Management (701810)

- Worldwide access to your process information with individually adjustable user rights and dashboards
- High degree of data security due to certification, end-to-end encryption, and redundant infrastructure
- Unlimited access to the dashboards using as many end devices as required via common web browsers without installation
- More efficient data management due to acquisition of data storage – including backup – by JUMO
- Alarm management through data evaluation, preparedness planning, and monitoring/remote alarm functions
